

### REMARKS

Transmitted herewith please find another copy of the amended drawing referred to in the Advisory Action dated July 16, 2003. This amended drawing was prepared in accordance with that previously filed amendment after final rejection. Apparently, the amended drawing has not yet reached the Examiner.

In her objection, the Examiner has found "an extra lead line". This finding is incorrect. The Examiner has apparently referred to a "data/control pathway" having an "arrow" to show direction of data flow. The same error has apparently been made in support of the erroneous finding that "reference number 148 and 100 are both pointing to the Cool ICE gateway" and that "reference numbers 152 and 154 are both pointing towards the storage". Cool ICE Gateway 100 couples to storage 154 via pathway 148 (as explained in the specification at page 29, lines 9-10). Similarly, Cool ICE Service Handler 102 is coupled to storage 154 via pathway 152 (as explained in the specification at page 29, line 9).

Please charge any deficiencies or credit any over payment to  
Deposit Account 14-0620.

Respectfully submitted,

Niels Gebauer, et al

By their attorney,

Date November 11, 2003
